5 millimeter black on white non-laminated tape for labeling CD spines. Versatile Tape Handling for a Wide Range of Applications The PT1280 is flexible when it comes to tape sizes and types. The PT1280 offers three different text sizes for added versatility, and it will automatically adjust the text size according to the size of the tape. Make labels with up to two lines of text. It also features five text framing options available for even more flexibility. No matter what kind of tape is used, the PT1280's 180 dpi print resolution allows for quick, accurate printouts. Print labels at brisk speeds of up to 10 millimeters per second. Compact Size and Ergonomic Design Take the PT1280 Labeler anywhere at only 6.28 x 5.94 x 2.36 inches and 1.04 pounds, it's compact enough for effortless portability. The PT1280 features a full QWERTY keyboard with raised, angled keys for easier typing. The easyview 15 character LCD display is large enough for easy onscreen reading and editing, and it allows for quicker style changes, such as outline, bold, shadow, italic, vertical, and more. Printing your favorite labels has never been faster or easier. It is backed by a one year limited warranty. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Vince 3.0 out of 5 stars There are many different ways to print labels. Sizes, fonts, direction etc. My complaints are that it will take awhile to learn how to use this product. Trying to figure out size, length, width, for every different kind of application is an exercise in trial and error. When trying to cut the label, the way it is positioned, your thumb hits the print button again. I have gotten better at this, but occasionally I print an unwanted label.

I would recommend this product, but make sure you buy a label cartridge at the same time. The starter cartridge does not last that long. I have used it while doing my decorating to label the branches of my artificial tree, the old labels were falling off. I have also used them to mark small bins that I use in my home office. I did not get the plug in power supply for this because I only use this every now and then for projects. I rewired my father's audio receiver since the family dog continually knocked loose the speaker wires and he would spend an hour figuring out where the wires went back. Not anymore. Used this for labeling tool locations in the garage, speaker wires, network cables and video cables. Keep in mind that this is a basic labeler. You won't get loads of fancy fonts or all the bells and whistles. But for basic use, this thing is really useful. Now, if you have neat handwriting, smudgeproof labels and a ultrafine Sharpie, then you might not need this. If you have the handwriting of a PhD writing you a prescription, look into this handy gadget. You can set it so it doesn't waste much tape at the end of the label. I bought an extra roll of tape when I got mine since the price of tape is much cheaper on Amazon than at Office Depot. But I am still using the tape that came with it. I would say this is a really good label maker if you are only doing the occasional label. When you tried to print a label, you could hear the motor running, but nothing ever happened. I disassembled the unit, and found that a gear was maladjusted; I tightened it up, and the label maker works great. All in all, worth the experience, but only if you're a do-it-yourselfer. Otherwise, this is a great label maker. I probably would not get this for business use or for high volume use. Positives Relatively easy to use, has different preset label lengths I use the one for file folders the

most, saves your last label.

Negatives Can waste some label when printing certain types of labels, does not come with an AC adapter, but for the way I use it an adapter would just get in the way makes it non portable and the batteries seem to last a long time.I label everything now and couldn't live without it. Select from the many frames, character sizes and styles to design beautiful custom labels. In addition, the variety of tape cartridges available allows you to print labels with different widths and exciting colors. Read this manual carefully before starting and keep the manual in a handy place for future reference. Do not use tapes that do not have Only use a soft, dry Use a soft wipe e.g. a cotton swab when Keep it out of both direct sunlight and rain. Language and unit settings will also be cleared. Otherwise, the batteries may leak or be damaged. Operation is subject to the following two conditions 1 This device may not cause harmful interference, and 2 this device must accept any interference received, including interference that may cause undesired operation.
